Nicholas Dragunow

Full Stack Web Developer

location: Vancouver, BC   *email:* ndraguno@gmail.com   *phone:* +1 236 986 6402   *website:* ndragunow.nz   *projects:* github.com/ndrag

A New Zealander based in BC with the right to work in Canada.

A well-rounded software professional with a strong background in consultancy. Senior roles in leadership, organisational change and management, data analytics, API design, and (chiefly) full stack web development. Seeking a challenging technical position in a high-performing team with scope to own projects and work directly with stakeholders.

Experience

Works for Good Link   **Founder & Developer**   *July 22 – Present*

- A Vancouver-based not-for-profit building & hosting web-based tools for organisations that do good – for free.
- Sourcing & pairing developers and technical advisors, finding clients, and overseeing projects & people.
- Iterating on our stack: Site templates (Laravel + Vue.js & React), hosting & CI/CD (AWS), reporting, etc.

WSP Link   **Senior Developer (Part Time)**   *Feb 22 – Present*

- Working with area experts to design and implement new features for an internal project management suite.
- Part time remote while travelling the world.

Devart Link   *April 20 – Feb 22*

- **General Manager (Nov 20 – Feb 22)**
- Management of all client relationships, projects, and personnel.
- Ongoing process implementation and management (including Agile) in tandem with the Technical Director.
- Project manager, business analyst, and developer across dozens of full stack PHP & JavaScript websites.

- **Full Stack Developer (Apr 20 – Nov 20)**
- Key developer of a Laravel + Vue.js project management suite used by thousands at WSP Australia.
- Ranked above all similar tools by a global review board. To be rolled out to 200+ offices in 35 countries to manage billions of dollars in project work.

Morphum Environmental Link   **Senior Developer (Contract)**   *May 20 – Nov 20*

- Developed a map-based tool for public consultation that integrates with local council & government APIs.
- Provided technical advice on quotes, internal infrastructure, staff roadmaps, and web-hosting solutions.

Abley Link   *May 17 – April 20*

- **Full Stack Developer (May 18 – April 20)**
- Grew a secondment into a technical lead position in a client's $5 million+ product team (Angular + Python).
- BA and developer for a suite of Python data-processing APIs behind a nationwide analytics platform.

- **Graduate GIS Consultant (May 17 – May 18)**
- Created global marketing sites for all product & professional service teams alongside the CEO.
- Developed a Kotlin + Mapbox Android app & undertook spatial projects in transport safety & accessibility.

Relevant Skills

Performant full-stack websites
